

## Introduction/Business Problem

Group of friends plan to open the Indian restaurant in Toronto with very less knowledge about the city, there plan is to find locations in Toronto most suitable for his setup and expansion into the city. The requirements are:

- Indian restaurants in the Neighbourhoods
- How expensive are these restaurants high, moderate, low.
- Day and Timings at which they serve the food

The objective is clarified & defined as to locate and recommend which neighbourhood(s) in Toronto best meet their requirements to start their restaurant plan. The information and research gained will help choose the best location by providing data on the venues present in each neighbourhood.

## Data

The necessary data needed for the analysis are from the following sources:

- City of Toronto Neighbourhood Profiles for providing an overview of the neighbourhoods in Toronto
- City of Toronto Neighbourhood Shapes for mapping: GeoJSON File
- Wikipedia for Toronto Neighbourhood Borough Designation
- Foursquare API to collect information:
  - Competitors in the neighbourhoods of Toronto
  - Opening and Closing Hours
  - Pocket friendly
